

Repeater Panel

Model RP-1/3

SPECIFICATION

The 'Aqualarm' RP range of Repeater Panels is for connection to the i-Zone range of control panels. The Repeater Panel is housed in a painted and stove enamelled mild steel housing.

The Repeater Panel will mimic the alarm status of the main i-Zone control panel, producing both an audible and visual alarm. The Repeater Panel is capable of monitoring up to three alarm inputs, each individually represented on the fascia of the panel by a separate LED.

The Repeater Panel is fitted with an Accept (mute) button to silence the alarm.
